Android 4.0: Settings > Personal > Security > Device Administrators >

Unknown Sources : [Y] Allow Installation of non-Market apps

Main Screen

After Installation, Open the application. You will see the Net Protector Mobile Security features main screen.

Before you start using this application, you are required to Register the software.

Tap on any button like “Scan” and you will be taken to the first time registration / activation screen.

Activation Wizard

Please fill all fields correctly and register your software in the name of the customer or owner of the mobile.

The screenshot shows the 'Activation Wizard' interface for 'Net Protector Mobile Security'. At the top, there's a status bar with '3G', signal strength, battery, and the time '11:39 AM'. Below the title bar, there's a green 'NP AV' logo and the text 'Net Protector Mobile Security'. The form consists of several input fields: 'Name' with the placeholder 'Customer Name', 'email ID' with the placeholder 'Email id of Customer', 'License Code' with the placeholder 'M-', and 'Activation Code' which is currently empty. At the bottom, there's an 'Installation Code' field containing '0000000004'. Three buttons are at the bottom: 'SMS' (orange), 'Online' (grey), and 'Finish' (grey).

Enter the Key
Number from the
Pack here
